BUILT WITH YOU IN MIND

Gable Sheds

Sizes: 8'x10' to 16'x52'

This is our most popular shed model providing a nice storage shed if you only need front access to your building. The gable shed will provide you a nice workshop or a small garage for your ATV. We also build this shed with a nice wide door and an optional ramp so you can drive in your lawnmower. A common method people purchase this building by is our rent-to-own program. With affordable monthly rent payments you can have a convenient and secure way to store your stuff. This model can easily be customized for your man-cave or she-shed.

Lofted Barns

Sizes: 8'x8' to 16'x52'

This is our most practical model of storage sheds. These series provide spacious floor space along with an overhead loft for additional storage space. You will get double use of your square footage making this a very cost effective way to handle your storage needs. If you need a roomy workshop with the convenience of overhead storage, this is the shed for you. This is also a very popular choice for hunting camps and “up north storage” solutions. And remember, these buildings are portable—thus providing a pre-built shed delivered to your yard, ready to use.

Lofted Garden Sheds

Sizes: 8'x8' to 16'x52'

This is also a very popular model for us. This shed will provide a very attractive addition to your backyard. Everything from garden tools to a workshop. Plus you get a bonus overhead storage loft to maximize your investment. This shed also features nice wide doors for your big stuff. Or if you're looking for a man cave to decorate to your likes, look no farther. This shed features two lofts, one on each side, allowing storage space for "his & hers".

Gambrel Barns

Sizes: 8'x8' to 12'x16'

The old time classic "mini-barn". This building is the ancestor of the portable storage buildings. You have that original barn look with this building while you are utilizing your storage area for those things you won't throw away. This storage barn comes delivered to your yard and as soon as our driver leaves you are in the storing business. And remember, we can customize your barn to your needs.

Animal Shelters

Sizes: 8'x8' to 12'x48'

Animals need shelter from the elements. Whether it's snow, hail, rain, or extreme heat, in order for health, you will want to provide shelter. Why not get a shelter where they can catch a little shade, escape flies, and get out of harsh wind or pounding rain. The beauty of the horse shelter is its simplicity. You can install a basic, attractive shelter that serves your animals needs, streamlines your chores and doesn't cost a fortune. Or go all out with the options, and treat your horse to the equine version of a 4 star hotel.

PREMIUM BUILT STORAGE SHEDS WITH AN AFFORDABLE PRICE

PREMIUM BUILT STORAGE SHEDS WITH AN AFFORDABLE PRICE

With a Reputation for Quality & Service

For two decades, Mid Michigan Barns has been serving the entire state of Michigan, offering the highest quality Amish-built sheds and barns. With our manufacturing headquarters located in Ewart, we are strategically located to best serve all corners of the state.. Wherever you are in Michigan, we're here to help!

Founded in 2002 in McBain, Michigan, an Amish man named Samuel Miller ordered enough material from the local lumber yard to build a few sheds. Samuel built the sheds in the driveway in front of his family barn, with hopes of selling them before his lumber bill was due. From there, Mid Michigan Barns began to grow faster than he ever imagined.

In late 2018, the ownership of Mid Michigan Barns changed hands to Stephen Miller and relocated just 20 miles south to Ewart, Michigan. Today, Mid Michigan Barns still offers the same high-quality, Amish-built sheds and barns we always have. With an ardent focus on workmanship, we utilize premium-grade building materials at a fair price.

Need A Permit?

Shed Permitting FAQs

In Michigan, state laws dictate that a permit is required for a shed that exceeds 200 square feet. However, local municipalities and neighborhood regulations may impose additional restrictions beyond state law. Familiarize yourself with local rules to ensure compliance, avoid surprise costs, and complete your project smoothly.

In most cases, if the shed exceeds 120 square feet or is taller than 8 feet, it requires a building permit. It's important to consult your local government for specific guidelines and requirements.

While the permitting process can vary - the following are the general steps you'll follow to obtain a building permit:

- Fill out an application form and submit it to your local building department
- Schedule an inspection to verify your plans meet local regulations
- Obtain signatures from the proper local government agents
- Pay assessed fees

Delivery

Our delivery drivers are committed to ensuring that you are completely satisfied with your building's placement and set up. We carry a unique piece of equipment, called a Mule, on each truck. The Mule is a maneuverable, forklift device to help place your new storage building into tight locations. A mule also minimizes damage to your yard, leaving tracks similar to those of a large mower.

FREE MUG
with Delivery!

Warranty

Mid Michigan Barns backs its buildings with a 7 year warranty on its workmanship. Defective workmanship causing issues with your building will be covered under this warranty. All materials are backed by the manufacturers of each product. (Details may vary.) Visit our website for more warranty details. www.midmichiganbarns.com

Site Preparation

1. CHOOSE A SITE You will want to choose a level site, and be sure there is a clear path to it.

2. LAY A PAD We recommend laying a limestone pad. Or you can pour a concrete one. Mid Michigan Barns offers gravel pad installation service. Call for pricing.

3. OBTAIN PERMITS Local zoning approval and permits, if needed, are the customer's responsibility.

4. ENGINEERED BLUEPRINTS and truss designs are available upon request from MidMichigan Barns.

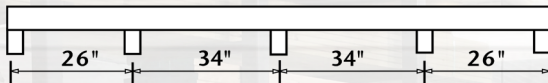

4-6" crushed limestone recommended for the pad

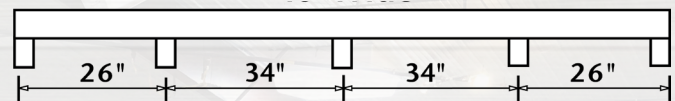

We offer site prep!

Rent To Own

DOES IT MAKE SENSE?

Our rent-to-own program is a great way to get started towards owning your own shed! Why rent out-of-the way, inaccessible storage units with never-ending payments when you can rent a shed in your own back yard and after 36 months own it?

Features and benefits of Rent-to Own:

- No credit check
- Instant approval
- Email confirmation
- Month by month agreement
- Flexible terms (24, 36, 48, 60 months)
- Multiple payment options (online, by phone, autopay, E-billing)
- Early purchase option (EPO): There is no fee to purchase early.
